SUMMARY

Senior Data Scientist with a strong background in Physics and over 6 years of experience in developing and implementing cutting-edge machine learning solutions. Proven expertise in automating complex data pipelines, optimizing operational workflows, and delivering data-driven insights. Demonstrated success in leading projects across various domains including fintech, e-commerce, telecommunications, and legal analytics. Passionate about sharing knowledge through teaching and speaking engagements.

TECHNICAL SKILLS

Programming Languages:

- **Advanced:** Python (Pandas, NumPy, Scikit-learn, SciPy)
- **Proficient:** JavaScript, Java, C++
- **Web Frameworks:** FastAPI, Flask, React

Machine Learning & AI:

- **ML Frameworks:** TensorFlow, PyTorch, Scikit-learn
- **AI Models:** Gemini, OpenAI GPT, Claude
- **Computer Vision:** OpenCV, DocumentAI, OCR
- **NLP:** NLTK, SpaCy, Transformers

Data Engineering & Analytics:

- **Databases:** MySQL, PostgreSQL, MongoDB, ArangoDB, Elasticsearch
- **Big Data:** Apache Spark, Apache Airflow, BigQuery
- **Visualization:** Metabase, Looker, Redash, Kibana, Matplotlib, Seaborn

Cloud & DevOps:

- **GCP:** VertexAI, Cloud Run, Cloud Storage, BigQuery, DocumentAI
- **Tools:** Docker, Git, CI/CD, Kubernetes

Domain Expertise:

- Machine Learning Model Development and Deployment
- Data Pipeline Automation
- Fraud Detection and Prevention
- Natural Language Processing
- Computer Vision and OCR
- Process Optimization
- Credit Risk Analysis
- Social Media Analytics

PROFESSIONAL EXPERIENCE

PT Pakar Digital Global (Paper.id)**Jun 2023 - Present***Senior Data Scientist**Jakarta*

- Led development of machine learning models and advanced analytics solutions, achieving 98.33% reduction in error detection time
 - Improved classification model accuracy from 76% to 93% for item categorization
 - Developed and deployed OCR solutions using DocumentAI and Gemini for automated document processing
 - Created automated reconciliation systems for finance operations, reducing processing time by 98%
 - Built comprehensive KYC/KYB validation system including face similarity scoring and document verification
 - Engineered "askquinta" Python library for standardized error handling and automation
 - Designed and implemented auto-selection system for Source of Fund (SOF) in disbursement processes
 - Developed Flask dashboard for bank statement analysis using Gemini, reducing checking time by 98%
-

PT Bukalapak.com**Jan 2022 - Jun 2023***Assistant Manager Audit Data Analytics**Jakarta*

- Developed automated audit dashboards using Redash and Looker, increasing team efficiency by 70%
 - Implemented network analysis for fraud detection, successfully identifying syndicates and account farming
 - Created automated response systems for audit data queries, significantly reducing manual intervention
 - Led fraud investigations using data-driven approaches, identifying internal and external fraudulent activities
 - Conducted Quadrant Analysis for Marketing team to optimize advertising partner selection
 - Identified and resolved system bugs in Payment Gateway fee calculations, enhancing revenue
-

PT Telkom Indonesia**Jan 2020 - Dec 2021***Data Scientist**Jakarta*

- Developed end-to-end legal analytics system processing data from 60+ websites
 - Built search engine and plagiarism checker for legal document comparison
 - Implemented NLP models for legal regulation harmonization
 - Conducted social media analysis achieving 80% user satisfaction in decision-making processes
 - Created sentiment analysis models for social media monitoring
 - Developed topic clustering algorithms for content categorization
-

PT Indonesia Indicator**Mar 2018 - Dec 2019***Data Scientist**Jakarta*

- Developed social scoring system for credit risk assessment using social media data
 - Created automated reporting engine for political campaign and brand analysis
 - Conducted network analysis for political issues and social media trends
 - Built bot-integrated reporting system for automated analytical report generation
 - Implemented sentiment analysis for brand perception monitoring
-

TEACHING & SPEAKING ENGAGEMENTS

Glints **2023**
Webinar Speaker *Online*

- Conducted 14 educational webinars on data science and AI topics
 - Created and delivered curriculum covering Python programming, SQL fundamentals, and machine learning
 - Achieved 4.8/5 average satisfaction score from 500+ participants
 - Topics included: Python for Beginners, SQL Fundamentals, Data Wrangling with Pandas, Linear Regression
-

Rumah Siap Kerja **2023**
Instructor *Online*

- Led 5-session comprehensive data visualization course for Prakerja program
 - Developed curriculum covering data concepts, analysis techniques, and visualization strategies
 - Achieved 85% completion rate across multiple batches
 - Topics: Introduction to Data Analytics, Data Preparation, Analysis Tools, Visualization Techniques
-

Edspert **2023**
Instructor *Online*

- Delivered workshop on Excel for career advancement
 - Achieved 90% satisfaction rate from participants
 - Covered advanced Excel functions, PivotTables, and data visualization techniques
-

Pintarin AI **2023**
Webinar Speaker *Online*

- Delivered comprehensive introduction to Data Science
 - Demonstrated practical applications using Python, Pandas, and Scikit-learn
 - Achieved 92% satisfaction score for content delivery
-

PROJECTS

ECLIP (Electronic Clipping) **2023**
Project Lead *Plabs*

- Led development of automated news monitoring system for West Java government
 - Built scraping solution for 300+ news websites
 - Implemented Elasticsearch-based search engine with custom ranking
 - Created dashboard monitoring system using Kibana for real-time analytics
 - Reduced manual work by 70% through process automation
 - Implemented sentiment analysis and trend tracking features
-

HONORS & AWARDS

- **Top 10 Finalist** - AI for Impact Hackathon APAC Region by Hack2skill (Dec 2024)
 - Distinguished among top innovators across APAC for developing cutting-edge AI solutions

- Created impactful AI applications using Python, GenAI, Gemini, VertexAI, DocumentAI, MLOps, Next.js, and Elasticsearch
- **Top 3 Winner** - IdeMenyala Hackathon Untuk Jakarta by Jakarta Innovation Challenge (Nov 2024)
 - Led team to create innovative solutions for Jakarta's urban challenges
 - Implemented solutions using Python, FastAPI, Data Analytics, GCP, BigQuery, and Smart City Solutions
- **Top 30 Finalist** - Telkomsel Tech Titans League Series 3 - Machine Learning Track (2021)
- **Top 30 Finalist** - Telkomsel Tech Titans League Series 1 - Data Science Track (2021)
- **Top 100 Finalist** - Telkomsel Tech Titans League Series 1 - Data Analytics Track (2020)
